

ISO-RW-CARD

Low Frequency Passive RFID Card

ISO-RW-CARD is a programmable read/write ISO format card with a 64 bit read-only passive RFID transponder. It includes transponder and antenna circuits packaged in a standard ID card, and can be punched and printed. ISO-RW-CARD is the perfect solution for personnel identification and access control.

- Description**
 - Read-only passive radio frequency ID card
 - For personnel identification and access control
 - Programmable with password protection
- Transponder** Amplitude Shift Keying, Biphasic/Manchester, RF/8/16/32/64, R/W, OTP, ISO11785/784 FDX formatting available
- Memory** 330 bits (224 bits read/writeable/protectable)
- Frequency** 125 kHz \pm 6 kHz
- Size** 85.6 x 54 x 0.76 mm
- Material** White PVC, printable
- Speed** 1953 or 3906 bits per second
- Weight** 6 grams
- Protection** ISO 7810.5.1.5 and ISO 7816-1
- Temperature** Operating: -35°C to +50°C
Storage: -35°C to +50°C
- Read Range** Reader dependent
- Part Number** ISO-RW-CARD
- Price** \$3.25 each (volume pricing is available)
